RE: Covid Outbreak SL4 Floor 2

Good Afternoon,

This memo is to advise you that Villa Marie second floor SL4 has a confirmed staff member positive case of COVID delta variant. Due to this we have been required to go into outbreak status. The outbreak status at this time is restricted to SL4 floor 2 suites 201-238.

The MOH has put in some restrictions that include:

- Only designated visitors allowed on this unit – that means the 4 people on the list will be the only people allowed to visit on this unit
- Residents who are not vaccinated are not to dine in the congregate dining area they will be served in their room
- Continuous eye protection (face shield/eye goggles) for all staff on this unit
- Prevalence swabbing for all residents on this floor and staff members
- Doors will be kept closed to this unit

We are hoping to contain this outbreak as we have in the past, however, we know that the Delta variant is more contagious than the original COVID virus. Please be diligent in handwashing and masking while on the site. If you are unwell please stay home.

As always if you have any questions please do not hesitate to reach out to myself or the LPN/RN on the floor.

Sincerely,

Lisa Manning
